Stonex®

Shower trays and baths

Roca

Founded in 1917 in Gavà (Spain), near Barcelona, Roca is widely recognised as a global benchmark for the design and manufacture of contemporary bathroom products. At the heart of our business is the desire to develop beautiful and functional bathrooms that contribute to better standards of living.

We believe in simplicity, especially when it comes to bathroom furniture. Our designs are instinctive and intentional. By focusing on what's important, we recognise the beauty in the everyday. Drawing on the knowledge and expertise of our global network, as well as over 100 years of experience in the sector, we develop innovative and sustainable solutions that promise to refine your bathroom while bringing comfort and simplicity to your daily routine.

The key to our consistent growth and progressive internationalisation is our close relationship with professionals across the industry. By listening and responding to the evolving needs of society, Roca has become an established manufacturer with 77 production plants across five continents.

Stonex®

At Roca we continuously seek inspiration in nature to develop products that contribute to the well-being of our clients. That is why we have been able to create an innovative material that combines aesthetics and safety for the manufacturing of shower trays and baths.

Maximum safety

Antislip
Its textured finish provides the product with Class C* antislip properties, which guarantee maximum safety in the shower, while offering a very pleasant and natural feel.

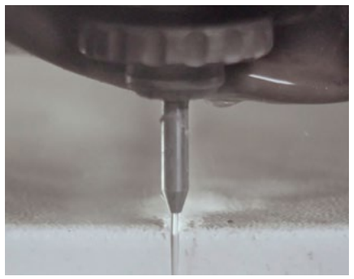
*According to DIN 51097 standard

Integrated and functional design

Extraslim
Its exclusive formulation allows the manufacturing of extraslim pieces that can be installed at floor level.
This achieves a fully coordinated look with all other bathroom elements, while removing barriers and allowing easy access to the shower.

Maximum durability

High resistance
Its outer layer guarantees extreme durability and its mineral pigments maintain their color over time. This results in shower trays that are highly resistant to wear and tear, chemical agents and fading due to sunlight and artificial light. This high-quality layer is also very easy to repair.



Adaptable to any space

Cut to size option
With the purpose of fitting into any space, Stonex® shower trays can be cut to size and adapt to any type of bathroom. To achieve the perfect aesthetic fit, the shower tray is cut symmetrically, leaving the waste in a lateral or central position, depending on the model of choice.

Low maintenance

Easy cleaning
Stonex® shower trays are highly resistant to chemicals and cleaning products, though rinsing the shower tray with soap and water is enough to keep it in perfect condition.

Maximum hygiene

Antibacterial
The shower trays' outer layer is endowed with antibacterial properties, preventing germs from spreading on the surface.

Shower trays

Discover the shower trays collections manufactured in Stonex® and choose the one that adapts best to your bathroom space.

High drainage capacity

Fast flow drain
The fast flow drain and slightly sloping planes allow the water to flow out quickly, avoiding bothersome pooling.

Easy maintenance

Removable trap
The drain grid is easily accessible and can be removed to clean and avoid clogging. The Terran and Pyros models also include a drain strainer, which allows lost objects to be quickly retrieved.

Maximum durability

High-quality steel
The grid of the drain is manufactured in high-quality stainless steel (AISI 304), which guarantees it will remain in perfect condition over time.

Seamless integration

Perfect joints
The defined lines of its edges and its even surface guarantee the perfect fit of the shower tray to the wall and the enclosure. The flawlessly designed 90-degree corners of the Stonex® shower trays allow their full integration with wall and floor tiles.

Resistance and durability

Stonex® shower trays show excellent results in endurance tests that measure the resistance to chemical agents such as hydrochloric acid, caustic soda and solvents, among others.

Inclination angle	Class
More than 24°	**C**
From 18° to 24°	B
From 12° to 18°	A
From 6° to 12°	-

Features

Terran shower trays can be installed either with frame, prioritizing minimalist aesthetics and reduced height, or without frame, opting for greater depth.

Extraslim

Antislip

Cut to size

King and Extra King size

New King-size and Extra King-size dimensions up to 2.00 x 1.40 metres to adapt to any bathroom space.

These formats feature a new ingredient in their formulation derived from rice husk that lightens the shower tray by up to 38%, making its transport and installation easier.

This new component makes the Stonex® formulation more sustainable, recycling natural waste and reducing CO_2 emissions.
